

# Custom made heritage & traditional timber window and doors

At Against the Grain Windows & Doors we have been called on many times for our expertise in replicating heritage and traditional styles of timber windows and doors.

We pride ourselves on the skills of our staff and craftsmen to produce beautiful new timber windows and doors in styles of bygone eras. These include the use of weights and cords for double hung windows, putty glazing, federation and colonial bar work. We carry an extensive range of profiles and can have cutters produced to match to existing profiles if needed.

We have access to an extensive range of patterned and coloured glass, and traditional window and door hardware from several reputable suppliers. On the following page you can view some of the more commonly used timbers for windows and doors.

Whether you are looking to replace existing heritage windows that no longer function as they should or need new windows for seamless blending of an extension onto a period home, you need look no further than Against the Grain Windows & Doors.

Call us today on **02 4782 3210** to speak to one of our knowledgeable staff members about your requirements.

Add the craftsman's touch to your home!

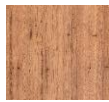

## TIMBER SELECTION

### *ACCOYA*

Accoya is a stable, sustainable and low maintenance timber. Your windows and doors are classified as carbon negative over their 50+ year life cycle. Accoya is a pale honey colour with performance characteristics of the most robust tropical hardwoods.

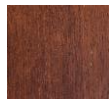

Imported  BAL 19\*

### *BLACKBUTT*

Blackbutt is an extremely versatile hardwood with colour ranges from golden yellow to pale brown. Blackbutt is prone to a small amount of twisting and shrinking.

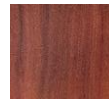

Australian  BAL 29\*

### *MERBAU*

Merbau is a very durable hardwood and is resistant to termites and decay. Merbau is dark reddish-brown in colour but is known to leach when a clear finish is applied.

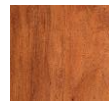

Imported  BAL 29\*

### *RED GUM*

Red Gum is known for its durability and strength. Red Gum has a distinct red colour range from pink to almost black.

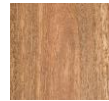

Australian  BAL 29\*

### *ROSEWOOD*

Rosewood is the ornamental wood of tropical trees. The heartwood of the tree is where the reddish-brown coloured timber comes from. Rosewood is a strong and heavy timber with excellent stability.

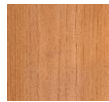

Imported  BAL 19\*

### *SPOTTED GUM*

Spotted Gum is a very tough hardwood with colours ranging from light brown to dark brown, but is prone to a small amount of twisting and shrinking.

Australian  BAL 29\*

### *WESTERN RED CEDAR*

Western Red Cedar is the most commonly used timber for windows and doors.

It is an extremely robust but soft timber. It has a stable grain structure, honey brown to very dark brown in colour.

Imported  BAL 29\* in a tested system
